🐙 github.com/ashenafi-messle

Versatile Software Developer skilled in building mobile applications, desktop software, web platforms, and AI-powered solutions. Experienced in full-stack development with a strong focus on performance, usability, and scalable system design. Passionate about solving real-world problems and continuously learning modern technologies.

📁 EXPERIENCE

Present

Software Developer, Personal Projects / Freelance

- Designed and developed full-stack applications independently
- Handled frontend and backend integration
- Improved application performance and usability

🎓 EDUCATION

Bachelor's Degree in Computer Science, University Of Gondar

🧠 SKILLS

Development Areas — Mobile App Development | Web Development | Desktop Application

Development | AI Integration • **Technologies** — Frontend: HTML, CSS, JavaScript, React |

Backend: Node.js, Express | Mobile: Flutter | Database: MongoDB, SQL | Tools: Git, GitHub, VS Code

📁 PROJECTS

Cafeteria Management System (Web & Mobile),

Technologies: React, Node.js, Express, Flutter, Supabase Sql Database

- Developed a full system for managing cafeteria operations for students and staff
- Implemented authentication and role-based access (admin, staff, student)
- Built QR-based attendance and validation system
- Designed both web dashboards and mobile apps

Echohive Social Platform, Technologies: React, JavaScript, CSS

- Built a social media platform where users share moods via audio, images, and posts
- Developed multiple pages including feed, profile, chat, and notifications

- Implemented routing and local storage features

AI Feature Integration, Technologies: AI APIs / Tools

- Integrated AI-powered features into applications to enhance user experience
- Explored automation and intelligent system behavior

★ ADDITIONAL

Soft Skills

- Strong problem-solving skills
- Fast learner and adaptable
- Ability to work across multiple platforms
