SUBJECT: LETTER OF RECOMMENDATION

To Whom It May Concern,

It is my pleasure to write this letter of recommendation for **Ashenafi Messie Gizaw**, a dedicated and hardworking individual whom I have had the privilege of knowing through his academic pursuits at the University of Gondar. As a Lecturer and the Final Year Project Coordinator in the Department of Computer Science, I have closely observed his academic growth, technical capabilities, and professional potential over the past year. I had the opportunity to teach Ashenafi in two advanced courses: Computer Security and Computer Vision & Image Processing. In both areas, he stood out for his sharp analytical mind and his ability to bridge complex theoretical concepts with practical, hands-on application. He consistently demonstrated a deep understanding of algorithm design, data security principles, and image analysis tools. In addition to his coursework, my role as the Final Year Project Coordinator gave me insight into his research methodologies, initiative, and project management skills. Ashenafi is a highly disciplined and self-motivated individual. He approaches technical challenges with a structured, problem-solving mindset, communicates his ideas clearly, and works exceptionally well both independently and in collaborative team environments. Ashenafi possesses the rare combination of technical competence, academic curiosity, and a strong work ethic. I am fully confident that he has the foundational knowledge and adaptability to excel in any endeavor he pursues next, whether it is advanced postgraduate study, a technical industry role, or a research-driven project. He has my highest and most enthusiastic recommendation. If you require any further information regarding his qualifications or performance, please feel free to contact me.

Sincerely,

Getnet Tigabie Askale

Lecturer, Department of Computer Science

College of Informatics, University of Gondar, Gondar, Ethiopia
